EndNote Web features

- Use Registration to access
- Web-based product
- Working group collaborations - share *EndNote Web* folders
- Link to Web of Science record, Related Records and Time Cited
- Search *ISI Web of Knowledge, PubMed* & hundreds of library OPACs directly
- Link to JCR 5 year Impact Factor

Features continued

- 2,300 publishing styles
- Search online databases
- “Cite While You Write”™ for Microsoft Word
- Unicode compatible
- Edit reference detail — add notes and keywords, modify any field
- Transfer records to & from EndNote
- Store up to 10,000 records per user account

Benefits

- Searchable records
 - Easy creation, access and usage
- Shared folders
 - An aide to collaboration
- Web browser
 - Use the product anytime, anyplace, anywhere
- Links to other resources
 - Web of Science, JCR, EndNote, Word

Bibliographic Fields:

Reference Type: Journal Article

Author: Bertin, E.; Arnouts, S.

Title: SExtractor: Software for source extraction

Year: 1996

Journal: Astronomy & Astrophysics Supplement Series

Volume: 117

Issue: 2

Pages: 393-404

Optional Fields:

Date: Jun

Type of Article: Article

Alternate Journal: Astron. Astrophys. Suppl. Ser.

ISSN: 0365-0138

Accession Number: ISI:A1996UQ73000014

Keywords: methods, data analysis; techniques, image processing; galaxies,; photometry; STAR-GALAXY SEPARATION; SPIRAL GALAXIES; ANALYSIS SYSTEM; NUMBER; COUNTS; PHOTOMETRY; DISKS; LUMINOSITY; EVOLUTION; IMAGES; FIELDS

Abstract:

We present the automated techniques we have developed for new software that optimally detects, deblends, measures and classifies sources from astronomical images: SExtractor (Source Extractor). We show that a very reliable star/galaxy separation can be achieved on most images using a neural network trained with simulated images. Salient features of SExtractor include its ability to work on very large images, with minimal human intervention, and to deal with a wide variety of object shapes and magnitudes. It is therefore particularly suited to the analysis of large

There are two ways to create a bibliography and in-text citations for articles and research papers.

For Microsoft® Word, use the [Cite While You Write™](#) plug-in.

For most other word processors, use the "Format Paper" feature with an RTF document. Follow these steps:

1. Select an RTF document to format. Type in the file name or use the 'Browse' / 'Choose File' button to find a file.
2. Select a bibliography format for your formatted paper.

After identifying quality search results, it is important to track these references for use in reporting and publishing. Users require –

- An accessible, searchable archive or “knowledge-base”
- An easy way to share knowledge amongst colleagues (facilitate collaboration)
- Authoring tools that relieve the retyping of references for reports, publishing journals and books, grants, *curricula vitae*, reading lists and more.

Introducing *EndNote Web* – Scheduled for release in late 2006

– for undergraduate students, mobile researchers and periodic writers

- A Web-based bibliographic solution that **complements and integrates seamlessly with ISI Web of Knowledge and EndNote desktop** so users can navigate between research and writing with greater ease.
- EndNote Web supports *EndNote* desktop users who desire a remote solution and expands the *EndNote* user community to new students and others who can benefit from the fundamental features in *EndNote Web*.

EndNote Web access

ISI Web of Knowledge (A&G) or EndNote site license subscribers receive **Free** access to *EndNote Web*

- Keep your *ISI Web of Knowledge* search results in *EndNote Web* between search sessions – a new personalization option
- View and link to *ISI Web of Knowledge* information
 - Times Cited
 - Related records and more!
- Transfer references between *EndNote* and *EndNote Web* for seamless integration with desktop tools

Abstract:

Despite its economic and cultural centrality, sport is a relatively neglected and undertheorized area of sociological research. In this review, we examine sports' articulation with stratification issues, especially race, class, and gender. In addition, we look at how the media and processes of globalization have affected sports. We suggest that sports and cultural sociologists need to attend more closely to how leisure products and practices are produced and distributed and how they intersect with educational, political, and cultural institutions. We propose the work of

Abstract:

BACKGROUND: House dust mite (HDM) allergen is one of the most common allergens to which asthma patients are sensitised. Prevalence of HDM allergy varies in the literature. Use of HDM-impermeable bed covers reduces exposure to HDM allergen. The aim of this study was to assess the prevalence of HDM allergy in a primary care population of asthma patients, as well as the use of HDM-impermeable bed covers by these patients. METHODS: A random sample of asthma patients between 16 and 60 years old was taken from general practices. Allergy was

The Microsoft Word document contains the following text:

The fossil in question was generally regarded to be the 220 million year-old remains of *tyrannosaurus*. Several years ago, however this hypothesis was overturned by the discovery of yet another species¹ which is now the undisputed progeny² of the species at hand. While the true origin of this larger reptile is quite uncertain at this time, it is thought to be from central or eastern Asia.

Where the other species³ arose is a mystery. If it was central Asia, we could reasonably infer that other reptiles were not dominant in this ecosystem. Some think that we will never know^{4,5}. However, fossils currently in the museum in Berlin provide strong evidence that the emerging reptile was small-boned and duck-billed⁵, possibly with a larger wing-like arm.

Objectives

- After this presentation, you will be able to
 - Describe different kind of referencing formats
 - Define the different referencing styles
 - Understand what are EndNote and other reference management tools
 - Find more information on EndNote
 - Tell how EndNote can help you manage your literature search in the library

Outline of session

- Referencing – why is it so important?
- Referencing systems:
 - Author, Date: Harvard
 - Numerical: Vancouver
- Citing references: exercise on referencing different types of document and media (including online)
- Bibliographic software for reference and citation

Referencing – why is it so important?

- Established academic practice
- Shows where you got your information – well-founded research
- Allows other researchers to trace your sources of information quickly and easily
- Acknowledges the work of other researchers
- Protects you against accusations of plagiarism

Which style should I use?

- Various different styles are in use
- If you are writing a paper for an academic journal, use the style that they specify
- If no advice, choose one of the University's recommended schemes:
Harvard, Numeric (Like Vancouver)
- Vancouver probably is the most suitable one for Health & Medical subjects

Main Important Referencing Styles

- 1. Author-Date Style
(Harvard Style)**
- 2. Numeric Style
(Vancouver Style)**

Author-Date format

In Text citations

- Cite your sources within your text by giving the **author's surname(s), year of publication**, and (when appropriate) page numbers:
- **Examples:**
 - Contrary to popular perception, violent crime has been shown to be decreasing (Johnson 2004)
 - James and Peters (2003) have argued that...

Author-Date format

Reference List Bibliography

- Citations in the text refer to a full reference in the bibliography
- All references are listed in author/date order:-

- **References**

- HOLLAND, M., 2002. *Guide to citing Internet sources* [online]. Poole: Bournemouth University. Available from: http://www.bournemouth.ac.uk/library/using/guide_to_citing_internet_sourc.html [Accessed 4 November 2002].
- OXFORD ENGLISH DICTIONARY, 1989. 2nd ed. Oxford: Clarendon Press.
- UNESCO, 1993. *General information programme and UNISIST*. Paris: UNESCO, (PGI-93/WS/22).
- WISEMAN, S., ed., 1967. *Intelligence and ability*. Harmondsworth: Penguin.

Numeric system In Text Citations

Each citation in the text is given a **number** in brackets:

Example:

- Ericson (1) and Milne (2) take the view that...
but other authorities (3) argue that...

References are listed in number order in the bibliography, & cited by that number each time they are referred to in the text.

Numeric system

Free, open source alternatives to EndNote

- Most of the open source alternatives listed below are citation generators, which means they don't store the citations for you, but they do automatically format them in a particular citation style after you've entered all the relevant information (author, title, etc.). A few others are markup languages, and one, Zotero, allows you to cite and store sources within your web browser.

Free, open source alternatives to EndNote

- [KnightCite Citation Creation Tool](#) - this site generates citations in APA, MLA, and Chicago citation styles
- [EasyBib](#) - this site generates citations in MLA and APA formats
- [NoodleBib](#) (requires free registration) - this site generates citations for APA and MLA citation styles

Free, open source alternatives to EndNote

- [Tech4Learning's Citation Maker](#) (requires free registration) - choose "Tools," then "Citation Maker" to generate citations for MLA and APA
- [Scribe](#) – this markup language is an ancestor of HTML and LaTeX (a citation system used by mathematicians, engineers, and scientists)

Free, open source alternatives to EndNote

- [LaTeX](#) - this document preparation system is for technical and scientific work. Click [here](#) to download it for free.
- [BibTeX](#) - an off-shoot of LaTeX, this markup language is supported by Google Scholar
- [Zotero](#) - as an extension of Firefox, this program allows you to import citations from web pages into a personal filing system (Firefox 2.0 is required to use this)

EndNote and Reference Manager

- The two most popular packages from ISI ResearchSoft
- Introduce a high level of flexibility and functionality to the bibliographic management process

EndNote

- EndNote includes 41 different reference types each with 52 fields
- More than 6000 different output styles
- More than 700 different Import Filters
- Access over 4500 Internet libraries (z39.50 sites) to search from within EndNote using connection files
- Access over Different databases to search from within EndNote

Pros and cons

- easy to use - Windows type interface
- convenient - automatic downloading
- flexible - many reference types and output styles
- accurate - you can keep track of publications used in your research

- requires time to learn
- some output styles may not be available or suitable
- not all online resources allow automatic downloading

The Concept Behind the Software

- The software will make some codes into your paper Word file which links the inserted reference in the text to the related record in the database & at the same time to the related number in the reference list.
- Simply talking, the EndNote works based on the links between records in databases, In-text citations & reference list citations.

- Cite your sources within your text by giving the **author's surname(s), year of publication**, and (when appropriate) page numbers:
- **Examples:**
 - Contrary to popular perception, violent crime has been shown to be decreasing (Johnson 2004)
 - James and Peters (2003) have argued that...

Author-Date format

Reference List Bibliography

- Citations in the text refer to a full reference in the bibliography
- All references are listed in author/date order:-

- **Example:**

- HOLLAND, M., 2002. *Guide to citing Internet sources* [online]. Poole: Bournemouth University. Available from: http://www.bournemouth.ac.uk/library/using/guide_to_citing_inter_net_sourc.html [Accessed 4 November 2002].
- OXFORD ENGLISH DICTIONARY, 1989. 2nd ed. Oxford: Clarendon Press.
- UNESCO, 1993. *General information programme and UNISIST*. Paris: UNESCO, (PGI-93/WS/22).
- WISEMAN, S., ed., 1967. *Intelligence and ability*. Harmondsworth: Penguin.

Numeric system In Text Citations

Each citation in the text is given a **number** in brackets:

Example:

- Ericson (1) and Milne (2) take the view that...
but other authorities (3) argue that...

References are listed in number order in the bibliography, & cited by that number each time they are referred to in the text.

Numeric system

Reference List Bibliography

Example:

1. ERICSON, E.E., 1991. *The apocalyptic vision of Mikhail Bulgakov's 'The Master and Margarita'*. New York: Edwin Mellen, p.153.
2. MILNE, L., 1977 . *'The Master and Margarita': a comedy of victory*. Birmingham: University of Birmingham, pp.62-3.
3. BARRATT, A., 1987. *Between two worlds: a critical introduction to 'The Master and Margarita'*. Oxford: Clarendon Press, p.96.

NB Each reference number points to a single reference only

Free, open source alternatives to EndNote

- Most of the open source alternatives listed below are citation generators, which means they don't store the citations for you, but they do automatically format them in a particular citation style after you've entered all the relevant information (author, title, etc.). A few others are markup languages, and one, Zotero, allows you to cite and store sources within your web browser.

Free, open source alternatives to EndNote

- [KnightCite Citation Creation Tool](#) - this site generates citations in APA, MLA, and Chicago citation styles
- [EasyBib](#) - this site generates citations in MLA and APA formats
- [NoodleBib](#) (requires free registration) - this site generates citations for APA and MLA citation styles

Free, open source alternatives to EndNote

- [Tech4Learning's Citation Maker](#) (requires free registration) - choose "Tools," then "Citation Maker" to generate citations for MLA and APA
- [Scribe](#) – this markup language is an ancestor of HTML and LaTeX (a citation system used by mathematicians, engineers, and scientists)

Free, open source alternatives to EndNote

- [LaTeX](#) - this document preparation system is for technical and scientific work. Click [here](#) to download it for free.
- [BibTeX](#) - an off-shoot of LaTeX, this markup language is supported by Google Scholar
- [Zotero](#) - as an extension of Firefox, this program allows you to import citations from web pages into a personal filing system (Firefox 2.0 is required to use this)

EndNote and Reference Manager

- The two most popular packages from ISI ResearchSoft
- Introduce a high level of flexibility and functionality to the bibliographic management process

EndNote

- EndNote includes 41 different reference types each with 52 fields
- More than 6000 different output styles
- More than 700 different Import Filters
- Access over 4500 Internet libraries (z39.50 sites) to search from within EndNote using connection files
- Access over Different databases to search from within EndNote

Pros and cons

- easy to use - Windows type interface
- convenient - automatic downloading
- flexible - many reference types and output styles
- accurate - you can keep track of publications used in your research

- requires time to learn
- some output styles may not be available or suitable
- not all online resources allow automatic downloading

Importing references

1. Create a EndNote database
2. Search Web of Science and mark the references for downloading
3. Select *Add to Marked List* and then *Marked List*
4. Select the fields to include: the abstract is recommended
5. Select *Export to Reference Software*
6. Select *EndNote* and then *OK*
7. Choose the EndNote database and then *Open*

Cite While You Write

Inserting a citation

1. Open the EndNote database
2. Open the Microsoft Word document and position the cursor at the location for the citation
3. Select *View - Toolbars - EndNote*
4. Select *Insert Citation* on the toolbar
5. Enter identifying text in the 'Search for:' box and select *Perform Search*
6. Highlight the citation and then select *Insert*

Cite While You Write

Formatting a citation

1. Select *Generate Bibliography* on the toolbar
2. Select *Harvard* in the output Style box and then *OK*

Deleting a citation

1. Highlight the citation and then select *Edit Citation(s)*
2. Highlight the citation to be removed
3. Select *Remove* and then *OK*
